SOURCE

1. The NIS (Y 39/K 24) airfield was located on the north-western town border, north of the Nisava River. The large and dry landing field had no drainage facilities and there were no concrete runways or taxiways.
2. The field was occupied by 400 to 500 men and about 32 Soviet single-engine aircraft. Flight training (individual flying) and parachute jumping in groups of five to seven men was done all day.
3. The following buildings were located on the southern and southwestern field border: solid quarters, flight control station, repair shops, and eight hangars four of which were still under construction (each 130 x 200 x 35 feet wooden and steel structures, concrete foundations).

25X1A

Comment:

The reported location of the airfield is in accordance with previous reports. According to a report of August 1947, only four hangars allegedly existed at the field. According to previous reports, the field is about 4,000 x 5,000 feet. Concrete runways are not available. According to this report, the airfield is assumed to be occupied by a fighter regiment.
